

# The Children's Burns Club

## Family Weekends

Our family weekends offer families the opportunity to meet and share experiences with other families who have been through and/or are still going through the journey that occurs following a burn injury or being seen by a Burns Consultant. The weekends aim to provide families with time together to do fun (and sometimes challenging) activities in a

supportive environment and allowing children, siblings and even adults to develop their confidence and learn new skills. We usually have between six and eight families; some of whom may not have been to an event with us before, and some who may have been to several. . A number of activities take place during the weekend, some of which will be based around physical activities, such as biking,

canoeing or climbing and some of which will be more experience based, maybe an entertainer or animal encounter. We always try and have a family swim session and a quiz!
