

## **CQUIN on AKI**

This year 2015/2016 all UK hospitals are required to take on this CQUIN in order to improve the care of patients post-discharge from hospital after recovering from AKI. Click [here](#) for the information that needs to be documented in the discharge letters.

Q1) Diagnosis of AKI and stage (refer results on MEHT Review)?

Q2) 2.1 Medication review for AKI has been done at diagnosis of AKI?

2.2 State in full nephrotoxic medications stopped (ACEI, ARB, Diuretics, Metformin\*, aminoglycosides, NSAID, PPI).

2.3 Will they be recommenced, and when.

Q3) Does the patient require follow up blood tests post discharge for monitoring of AKI recovery?

Q4) Please state type and frequency of blood tests (weekly/fortnightly/monthly)
